7-PDF Portable Pack
Installation Guide

Date	2020-05-31
Version	1.8.0
Program	7-PDF Portable Pack 2:1

Step1: Unzip the ZIP archive "7-PDF-Portable-Pack-2-1-v1.8.0.zip" you just downloaded from 7-pdf.de. In most cases, even double-clicking on the ZIP file under Windows will open it.

If you have not already done so, first install the *"PortableAppsLauncher"* (more information about the PortableApps Launcher in this manual on the last page) on your USB stick connected to the PC. To do this, start the setup file "PortableApps.com_Platform_Setup_16.1.1.paf.exe" and follow the instructions of the installation program.

Note: If you already have the PortableApps Launcher installed on your USB stick or portable drive, Step1 is not necessary. All screenshots below may differ from the latest version. The documentation steps are also valid for newer versions of the programs and should be helpful.

Step2: After installation, you can start the PortableApps Launcher by double-clicking on the connected USB stick "Start.exe" with the left mouse button.

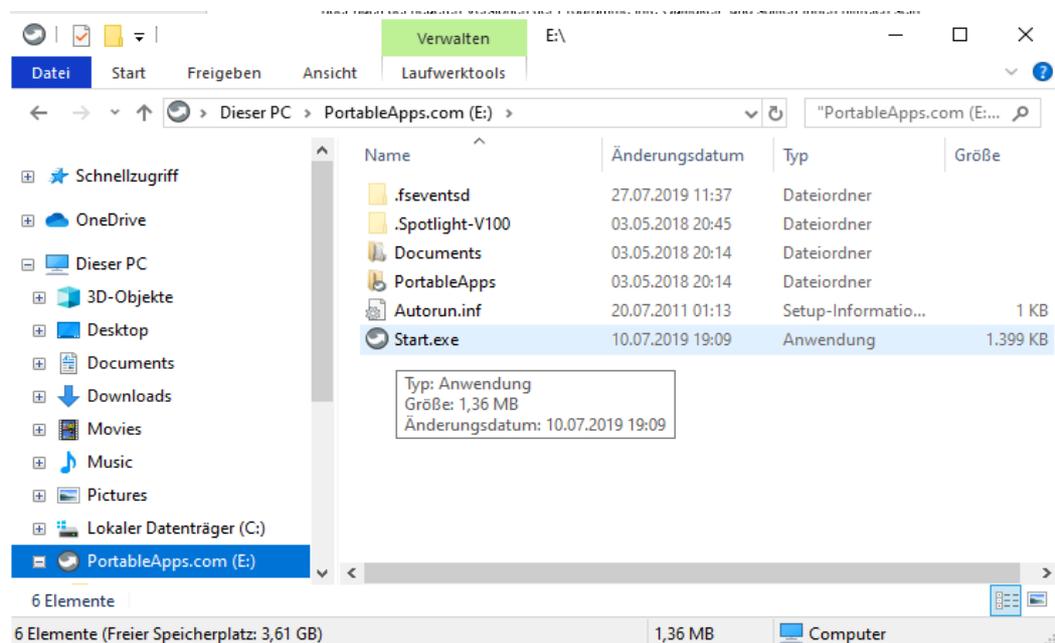

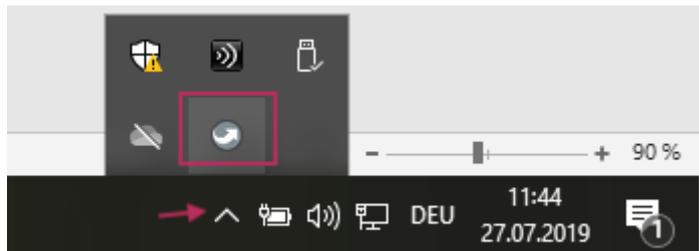

The launcher also integrates itself directly as an icon in the system tray menu of Windows, and can easily be accessed again whenever necessary, as long as the USB stick is connected.
